### **FELLER BUNCHERS** 753J/759J/903K/909K/953K/959K TRACKED

## Tough bunch of fellers.

Loggers demand maximum productivity and uptime out of their equipment, shift after shift. And John Deere 700J-Series and 900K-Series Tracked Feller Bunchers deliver, big time. Each features a powerful fuel-efficient engine, fast hydraulics for superb multifunction operation, deep cutting swath, and best-in-class head accumulation for maximum productivity. Quick, wide-open access to service items and major components along with simplified maintenance help maximize uptime. Plus, the spacious, well-appointed cab provides everything operators need to bring out their very best. With one of these tough feller bunchers on your jobsite, working hard has never been so easy.

# Ready, willing, and stable.

When you are ready to increase productivity, choose a 700J-Series Feller Buncher. Combining faster hydraulics, 50-percent-more cutting swath, and a best-in-class boom, these powerful, agile machines give you more muscle to handle more trees, with a faster saw-recovery time. 700J-Series Feller Bunchers are not only plenty able, but very stable. Choose the larger U7 undercarriage option on the 753J for even more stability in rugged terrain. The 759J's industry-exclusive Shift-Tilt<sup>™</sup> leveling system provides the leverage needed for cutting on steep slopes.

**Best-in-class boom** increases cutting efficiency and optimizes cutting time, maximizing productivity.

**Fast, cool hydraulics** ensure smooth multifunction operation, no waiting for power — or oil. Get more done, faster, with more precision.

**Cutting swath increased 50 percent,** so operators can make more strategic and productive cuts with less tracking and traveling.

Attachment valve location improves overall felling-head efficiency and cycle times. The simplified design eliminates 20 connections and over 100 feet of hoses and tubes.

**Shift-Tilt auto-leveling system** provides superb stability for cutting on difficult slopes. Four-way leveling shifts the upper structure a full three feet forward, optimizing the machine's center of gravity on steep inclines.

**Larger U7 undercarriage option** provides additional stability for handling hilly or rocky terrain on the 753J, adding over 5,000 pounds and 11 inches of length. With increased ability to gather full loads, operators will be more productive.

**State-of-the-art diagnostics** on the 700J-Series Powerview<sup>™</sup> monitor help speed troubleshooting and decrease downtime.

## Tame the toughest woods.

The worst of the woods brings out the best in a 900K-Series Feller Buncher. Largedisplacement 9.0L engine delivers the power you need to get the job done quickly and efficiently, while conserving fuel. The best-in-class leveling system keeps you steady and centered on rocky or steep terrain. Plus, the enhanced multifunction LCD color monitor provides quick push-button access to a wealth of machine info and superior onboard diagnostics to keep you up and running. And ready to take on whatever the woods throw your way.

**Engine delivers from 300 to 330 horsepower,** ensuring superior swing torque, boom performance, and tracking on K-Series models — without compromising best-inclass fuel efficiency. And the 295-gallon fuel tank lets you get more done between fill-ups.

**CommandCenter™ advanced display unit** shows operating, diagnostic, and maintenance info on a color LCD screen with **easy-on-the-eyes clarity.** Best-in-class onboard diagnostics simplify preventative maintenance work and troubleshooting for increased uptime.

**Sealed-switch module** keeps out dust, moisture, and debris, so it **virtually never wears out.** Proven marinegrade touchpad eliminates rocker switches, numerous wires, and unsealed connections, and lasts 10 times longer than standard dash switches. Hydraulically actuated door to the engine and pump enclosure ensures fast service access, for easy and efficient maintenance.

Standard reversing cooling fan automatically clears leaves, pine straw, and other debris from the grill, for better airflow to the engine.

**Robust hydraulics system** ensures long-lasting reliability. The power-management system ensures no horsepower is wasted, for smooth multifunction operation.

**Best-in-class leveling system** keeps the upper frame parallel to the ground, even when the tracks are climbing or tilting. The system tilts 26 degrees forward, seven degrees rearward, and 14 degrees to either side, keeping the operator in a comfortable, level position.

# Brings a whole new meaning to the term "mobile office."

Who wouldn't be more productive working from the fully adjustable suspension seat of a John Deere feller buncher? The comfortable, well-appointed cab offers plenty of space to get things done. Quiet and smooth running, too, with isolation mountings to reduce noise and vibration. A wide expanse of glass provides excellent all-around visibility. And a high-power HVAC system ensures year-round comfort. Other fatigue-beating amenities include an AM/FM/CD/AUX radio, two 12-volt power ports, generous storage space for cell phones and other carryons, and bright cab lighting. Everything your operator needs to conduct business "on the go" — and be more productive longer.

- Visibility is virtually unobstructed, due to the wide expanse of front and side glass, a skylight, and a bottom window (900K Series). An optional sunshade for the rear window on 900K-Series machines keeps the cab cooler, while reducing glare.
- **2.** Joysticks and low-effort controls with backlit indicators are conveniently located within the adjustable armrests.
- **3.** Tree counter (900K Series) operates in either automatic or manual mode. Automatic mode counts stems based on follow-arm sequencing and saw rpm pull-down. Manual mode tracks each tree cut with a push of the button on the joystick.

Fatigue-beating joysticks with smooth, responsive hydraulics put intuitive control at your fingertips.

JDLink on 900K-Series machines gives you 24/7 online access to machine location. Track machine health, utilization, and fuel consumption — valuable information that helps you better understand costs and jobsite performance. Plus, you can help protect your machine from theft by setting up geofence and curfew alerts in your JDLink account.

### Rapid Cycle System (RCS) boom option

This option for 900K-Series machines allows faster, low-effort boom control using only a single joystick — for more productivity with less fatigue. RCS includes the following features:

- Straight-Line Rapid Cycle Boom single forward motion of the boom/stick/head engaged using joystick.
- Auto Head Level automatically maintains the head's cutting position throughout the boom-reach cycle.
- Auto Arm Sequencing grab-arms and accumulator-arms automatically sequence to gather cut trees with the press
  of a single joystick button.
- Quick Release all four arms open simultaneously for a quick bunch release with the press of a single joystick button.

# Our felling heads are at the head of their class.

Delivering superior accumulation capacity, our high-rotation heads allow you to cut more wood from one position and load each skidder to capacity from a single bunch. Our patented offset disc saw blade keeps you moving at high rpm without slowing or stopping. These rugged felling heads won't let you down either. The wrist delivers triple the life expectancy, and the saw housing prevents vines, chips, and sap from binding.

FS20 felling head for 700J-Series machines delivers top-ranked mixed-stand accumulation capacity. Ideal for small-diameter thinning or handing large single stems up to 20 inches.

High-rotation FR26 and FR24B felling heads for 900K-Series machines cut more wood from one position to give the skidder a full load from a single bunch.

Versatile 30-degree wrist on the FS20 provides ± 15degree rotation and strong clamping force. Wider arm spacing and horn design deliver a high-accumulation capacity for increased productivity.

Patented offset disc saw blade and one-piece rotatable teeth on the K-Series keep the saw moving — and you from waiting.

Three-piece saw housing is bolted, not welded, for easier service. And it's protected by a wear plate for longer life.

Offset horn design and superior gathering arm keep stems aligned to hold larger bunches with better control and less stem breakage.

- 1. Deere-designed high-rotation wrist delivers best-in-class accumulation capacity. Its more compact design improves visibility to the felling head for increased productivity.
- 2. New high-rotation FR21B felling head for 700J-Series Feller Bunchers enables loggers to cut more trees, track less, and be more productive. Superior pickup force allows effortless placement of fallen trees.
- **3.** A gate blocks chips from entering the saw housing, preventing clogging. Wide-open exit area further prevents buildup.

# Cuts costs while cutting timber.

Cutting wood isn't the only area where your John Deere tracked feller buncher excels. Lowering daily operating costs and simplifying maintenance are among the many other things it does well. Deere diesels deliver best-in-class fuel efficiency. Easy, wide-open access to checkpoints makes quick work of daily checks, while a clean hydraulics layout, common hydraulic components, and spin-on filters ease periodic maintenance. Plus, industry-leading parts and service are always within easy reach.

- Quick, wide-open access to service items and major components speeds daily checks and periodic maintenance. Maintenance work that used to cost you a day now takes just an hour.
- 2. Streamlined, easily accessible hydraulic systems make maintenance a breeze, increasing uptime and lowering daily operating costs. Common hydraulic reservoir internal components such as independent suction lines, case-drain filtration, and common return filters simplify changes and keep costs down.
- **3.** Optional platform counterweight on 700J-Series machines features slip-resistant surfaces and a convenient ladder to help ensure safer and easier service.
- **4.** New boom debris guard on the 700J Series prevents nearly all debris from entering the engine compartment.

## 753J / 759J

Engine	753J		759J
Manufacturer and Model	John Deere PowerTech™ 6	0010	John Deere PowerTech 6081H
		0010	
Non-Road Emission Standards	EPA Tier 2/EU Stage II		EPA Tier 2/EU Stage II
Displacement	8.1 L (494 cu. in.)		8.1 L (494 cu. in.)
Peak Power at 2,000 rpm	180 kW (241 hp)		180 kW (241 hp)
Net Power (ISO 9249) at 2,000 rpm	164 kW (220 hp)		164 kW (220 hp)
Net Peak Torque at 1,400 rpm	1230 Nm (907 lbft.)		1230 Nm (907 lbft.)
Fuel Tank	584 L (154 gal.)		584 L (154 gal.)
Cooling	753J / 759J		
Fan Type	Suction type, belt driven		7501
Powertrain	753J		759J
Undercarriage	U6 (standard)	U7 (optional)	U6 (standard)
Travel Speed, Forward and Reverse:			
High	3.8 km/h (2.4 mph)	3.5 km/h (2.2 mph)	3.8 km/h (2.4 mph)
Low	1.8 km/h (1.1 mph)	1.6 km/h (1.0 mph)	1.8 km/h (1.1 mph)
Tractive Effort	256 kN (57,600 lbf)	292 kN (65,500 lbf)	256 kN (57,600 lbf)
Travel Brakes		itomatic application, integra	al with track-drive gearboxes
Hydraulics	753J / 759J		
Main Pump:	Variable-displacement, ax	ial-piston	
Maximum Rated Flow	360 L/min. (95 gpm)		
Continuous Saw Pump:	Dedicated variable-displa	cement, axial-piston	
Maximum Rated Flow	114 L/min. (30 gpm)		
Attachment Pump:	Dedicated axial-piston		
Maximum Rated Flow	135 L/min. (35 gpm)		
Oil Filtration	2 main return filters, 10-n	nicron return with bypass	
Electrical

### IT'S ABOUT TIME THE ODDS WEIGHED IN YOUR FAVOR.

We know the forest stacks the odds against you. But the new 753J features a larger undercarriage option that is tipping the scales to your advantage. This next-size-up U7 carrier adds over 5000 pounds of stabilizing force and an 11" longer track that eats up rocky, hilly terrain. Plus, a lower center of gravity makes it easy to gather a full head load. All in a machine designed not to quit. So no matter how steep the challenge, you're always on solid ground. For more info, see your dealer today, or call 1-800-503-3373. At John Deere, We're For Loggers.
