# Underhaug 3745

## 4-row potato planters

*TKS is proud to introduce its latest range of cup potato planters for the professional growers world-wide.*

*For decades Underhaug planters have been known for their accuracy, high performance and durability. They are highly appreciated among operators for their ease of operation, easy adjustments, simple design and low maintenance requirements. Compared to earlier models the Underhaug 3745 offers many new and unique features.*

**The 3745 is a high capacity machine for large acreage. It's an excellent 4-row alternative for growers who could really use a 6-row machine but for some reasons prefer to operate 4-row equipment.**

The 3745 planter is operated and controlled by hydraulics and electronics, and offers immediate seed space setting as well as adjustment of fertiliser volume from the tractor cab during planting.

Even though the 3745 machine resembles former Underhaug planters, it represents a completely new design, but is still based on the facts we know from many years of experience. The well-proven Underhaug planting unit now offers considerably higher planting speed without this interfering with the accurate seed placing.

Low power requirement is another feature with all Underhaug machines. They pull easy under all conditions, and combined with the easy-to-operate computer, automatic options and very few moving parts, potato planting is now easier and quicker than ever before. With a 5 ton bunker and 1,8 ton fertiliser tank down time for re-filling is reduced to a minimum. When planting with a constant speed of 10 km/h at 90 cms row distance the 3745 will nominally plant 35 ha in a 10 hour day, depending somewhat on seed spacing used.

### **Technical specifications 3745:**

Length	6,0m
Width (at 90 cm rows)	4,0m
Height	1,9m (min.)
Weight	4,2t – 5,6t
Standard wheel size	11,2 x 24" (4 pieces)
Standard planting shares	HD w/shock absorbers
Seed spacings	10 – 60 cm
Potato hopper capacity	5 t
Fertiliser tank capacity	1,8t
Oil requirements	35 ltrs min at 180 bar
Steel planting cups with 2 insert sizes (plastic)	

### **Options:**

*Automatic planting depth control  
Fertiliser machine (stainless steel with belt feeding)  
Coulters for fertiliser placing  
Floating planting shares  
Various tire sizes  
Hydraulic marker arms  
Ridge former*

**The Underhaug 3700 range includes 2-, 4-, 6- and 8-row potato planters.**
