

## Trackaxle applications. long load jinkers.

Trackaxle features:

1. Self tracking in forward travel.
2. Remote control steering in reverse
3. Remote control steering in low speed forward travel.
4. Sub frame based system.

**The Trackaxle advantages:**

- **Self tracking improves the on road performance while making deliveries, improving safety and reducing delivery times.**
- **Remote controlled reversing allows loads to be positioned quickly and accurately at delivery sites.**
- **Going forward at low speed, the remote controlled steering allows the steersman to travel in the following escort vehicle, alighting on extremely tight corners to precisely guide the long trailer's rear.**
